Summary

Software developer with 3+ years of experience building and shipping full-stack web applications and backend systems. Focused on clean code, security, and long-term maintainability. Comfortable owning a project from requirements to deployment and ongoing maintenance.

Skills

- Languages: TypeScript, C, Go
- JavaScript/Runtimes: Node.js, Bun
- Databases: PostgreSQL, MongoDB, SQLite
- DevOps: AWS (EC2, S3), Linux, GitHub Actions, Docker

Experience

Oxypur – Company Management Platform • Freelance

Nov 2024 – Present

- Building and maintaining a web-based business management platform — inventory, finances, and document generation.
- Automated financial reporting workflows, noticeably reducing manual admin work for the client.
- Responsible for hosting a custom Ubuntu VPS with Nginx and SSL, CI/CD pipeline via GitHub Actions, and continuously shipping new features.
- Ongoing project — handling system maintenance, auditing, and feature development.

Judicial Case Management Desktop App • Freelance

Apr 2025 – May 2025

- Built a local-first desktop app for judicial commissioners to manage 500+ case files.
- Fully offline with secure local storage — made daily work more reliable for the legal team.
- Focused on a simple, practical UI for non-technical users.

Full-Stack Web Developer • Developyo • Remote

Oct 2022 – Oct 2023

- Delivered 4+ full-stack projects across e-commerce, business management, and real estate.
- Built dashboards and web apps using React, Express, and Tailwind CSS.
- Improved app performance through frontend optimization and backend caching.
- Handled client communication from kickoff to delivery with positive feedback on all projects.

Web Development Intern • EDconcept24 • Agadir, Morocco

Apr 2021 – Jun 2021

- Helped build and maintain web solutions for small business clients.
- Contributed to delivering one web app and one WordPress plugin on schedule.
- Worked on frontend implementation and bug fixing alongside senior developers.

Projects

- **Up Down Cloud:** Full-stack cloud storage app built with Qwik and QwikCity. Uses 2 separate microservices — one for auth, one for file management. Built with TypeScript, Bun, PostgreSQL, Drizzle, AWS.
- **Web Crawler CLI** (npm package): Published CLI tool for crawling websites and generating CSV reports. Available on npm as m-web-crawler. Built with TypeScript and Node.js.
- [More on my GitHub profile.](#)

Education & Certifications

- Software Engineer Professional Certification – Codecademy (Feb 2025)
- Computer Science Professional Certification – Codecademy (Jul 2024)
- CS50: Introduction to Computer Science – Harvard (Dec 2023)
- Associate degree – Web Development & Multimedia (Jul 2021) • Agadir, Morocco
